Contemporary romance author

L'AMOUR FRANCHIT LES FRONTIÈRES
LA PASSION ÉCRIT L'HISTOIRE

Seoulmates:
Two souls who weren't looking for each other
and yet found one another.

The World of Soulmates

The concept: A series of six standalone stories, each centred on one of the members of the K-pop group SoundFate. Whilst the saga is set in France and South Korea, it follows the group's international rise, taking readers on a journey through their encounters and world tours.

Themes and Commitments: Far more than mere romances, these novels tackle universal social issues with sincerity:

- Cultural clashes and homesickness.
- Media pressure and the hidden side of fame.
- Resilience in the face of adversity (divorce, betrayal, illness).

Tropes :

- Age Gap
- Celebrity Love (Idol & Unknown)
- Dual Perspective
- Soulmates...

First Novel : Noor & Noah

"I'm a hopeless romantic; I grew up watching cartoons that taught me that if I waited long enough, a prince would come along and my life would be perfect. Now I know that even if I sing in tune, no animal will ever chirp along with me in the forest, that Prince Charming is usually an emotional bastard, and that if he does turn up, he very often leaves again."

Noor is 37 and leads a well-ordered life in Paris.

Freshly divorced, this pattern-maker for a major Italian fashion house is an eternal romantic.

But her ex-husband's infidelity has left her heart in tatters and her self-confidence seriously shaken.

Noah is 27 and lives in Seoul, where his daily routine is meticulously planned.

As the frontman of a K-pop band, nothing in his life is left to chance.

Romantic relationships are off-limits: a single rumour could scare off his fans and jeopardise his career.

So he has grown accustomed to fleeting, one-off encounters. Nothing more.

Until the day everything goes off the rails.

The design for the suit he was due to wear on his upcoming world tour is leaked and ends up on a fast-fashion website.

Noor is then rushed to Korea to create a new, bespoke suit for him.

They have nothing in common.

Nothing, except this attraction they hadn't anticipated.

And this urgency that will force them to spend time together, very closely...

Set against a backdrop of K-pop and haute couture, a romance full of rhythm, sparks... and jet lag.

Second Novel : Ondine & Ha-joon

In Paris, Ondine runs her own recording studio.

In her hectic life as a mother and businesswoman, she thinks she has found the perfect balance... until the day her husband proposes a new arrangement: turning their marriage into an open relationship.

Feeling unsettled, she flies to Italy with her best friend, Noor, to attend a K-pop concert. There, she crosses paths with the mysterious Ha-joon. What if love has a few surprises in store for the woman who boasts of never having been in love?

9,000 kilometres away, in Seoul, Ha-joon is an idol with global success. Celebrated more for his good looks than for his talent, he feels stifled by his image as an untouchable diva in an industry that curbs his creativity. What if his encounter with this Frenchwoman with pink hair were to turn his whole world upside down?
